Portfolio

Education

Sir M. Visvesvaraya Institute of Technology

B.E. in Electronics and Communication Engineering (ECE) – CGPA: 8.2

Aug 2023 – Jul 2027

Bengaluru, KA

Experience

Emolar Technology

DevOps/Cloud Intern

May 2026 – Jun 2026

Remote

- Built and hosted a fully functional static website on AWS S3, integrating Amazon CloudFront for low-latency content delivery and Route 53 for custom domain and DNS management.

Technical Projects

Cloud-Native Monitoring Ecosystem (Prometheus + Grafana + Loki) 🔗

- Engineered a centralized node-monitoring architecture across 3+ live clusters using Prometheus and Node Exporter to ingest 50+ core system metrics dynamically.
- Designed high-fidelity Grafana visualization boards and integrated distributed LogQL querying via Loki, cutting microservice debugging lifecycles by ~40% through query-based analysis.

High-Availability AWS EKS Workload Deployment 🔗

- Architected a containerized multi-tier stack (Frontend, Node.js Backend, Database layer) natively running on AWS Elastic Kubernetes Service (EKS) with high availability and load balancing.
- Configured complete automation via a production Jenkins pipeline, dropping manual deployment friction by ~60% and enabling consistent releases via ALB routing.

Full-Stack DevOps SaaS Platform 🔗

- Authored a modern SaaS utility using React, Node.js, and MongoDB, standardizing the application lifecycle inside isolated Docker runtimes orchestrated via Kubernetes nodes.
- Implemented resilient routing via Nginx Ingress Controllers paired with local persistent storage constraints (PV/PVC) to build scalable and fault-tolerant architecture.

Terminal-Driven Inventory System (C++ & MySQL) 🔗

- Programmed a secure database management client with secure CRUD operations using MySQL Connector/C++.
- Optimized complex transaction operations and indexing routines, significantly improving data retrieval efficiency and handling structured inventory records reliably.

Technical Skills

- Programming Languages:** C++, C, Python, SQL, Verilog, Bash, Go
- DevOps & Cloud:** Docker, Kubernetes (K8s), Jenkins, Terraform, AWS (EKS, EC2, ALB, S3)
- Observability & Tools:** Prometheus, Grafana, Loki, Git, Nginx, Linux, VS Code, VirtualBox
- Databases & Concepts:** MySQL, MongoDB — Object-Oriented Design, DSA, System Design, CI/CD Pipelines

Professional Certifications

- Cloud DevOps Engineering Foundations
- Architecting Large Language Models (LLMs)
- Intellectual Property Rights (IPR) Core
- Deloitte Data Analytics Certification
- SQL Advanced Database Administration
- Advanced Data Structures & C++ Programming

Extra Curricular

- National Winner, IIT Bombay** – Awarded 1st place in the flagship national entrepreneurship challenge hosted by E-Cell, IIT Bombay.
- EUREKA Zonal Finalist** – Recognized among premium high-potential ventures globally in a highly selective startup incubator track.
- Operations Head, E-Cell SMVIT** – Spearheaded corporate strategy and regional summits; represented the institute at premium external leadership forums including NMII and SJU.
- AERS Corporate Representative** – Handled complex stakeholder pitches, representing core operational and infrastructural frameworks across regional tech platforms.
